Summary

Senior Frontend Engineer specializing in React, Next.js, and TypeScript with over 5 years of experience. Expert in developing accessible, high-performance UIs that meet WCAG standards. Impact-driven professional who improved application performance by 30% and minimized production bugs by 60%. Published author with excellent communication skills, adept at navigating Agile cycles and stakeholder management.

Core Skills

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Design, Cross-Browser Compatibility, WCAG Accessibility

Backend & APIs: REST APIs, GraphQL, API Integration

State Management: Redux, Context API

Architecture & Performance: Component-Based Architecture, Micro-Frontends, SSR, SSG, Web Performance Optimization, Core Web Vitals, Code Splitting, Lighthouse

Testing: Jest, React Testing Library, A/B Testing

Tools & DevOps: Git, CI/CD, Docker, Vite

Practices: Agile Methodologies, Cross-Functional Collaboration

Work Experience

Senior Frontend Engineer — Promit and Company, Government-registered startup (India)

Jan 2021 – Present, Jharkhand, India

- **Designed** and implemented scalable micro-frontend architecture using React.js, Next.js, and TypeScript for large-scale web applications, enabling reusable components and independent deployments.
- **Improved** application performance by 30% by implementing code splitting, lazy loading, and advanced optimization techniques, enhancing UI responsiveness and user experience.
- **Enhanced** and optimized SEO strategies using SSR/SSG in Next.js and efficient API integration (REST, GraphQL), improving Core Web Vitals, page load speed, and search engine rankings.
- **Lowered** production bugs by 60% through TypeScript adoption, automated testing (Jest, React Testing Library), and CI/CD pipelines, while leveraging A/B testing and performance monitoring for data-driven decisions.
- **Led** frontend development initiatives and mentored junior developers, accelerating feature delivery by 40% and improving overall code quality and maintainability.

Projects

1. [Real-Time Wildfire Tracker](#) - React, Leaflet, NASA EONET API

- Built a responsive, scalable real-time web application using React, integrating NASA EONET API to deliver live geospatial wildfire data for global wildlife researchers.
- Optimized frontend performance and UI rendering for large datasets, ensuring smooth user experience and cross-browser compatibility.

2. [Online Bookstore \(Author Platform\)](#) - Vanilla JavaScript, PayPal SDK

- Created a responsive e-commerce web application using JavaScript, enabling users to browse and purchase self-authored books with a seamless user experience.
- Integrated secure payment processing using PayPal SDK, ensuring reliable transactions and smooth checkout functionality.

3. [BreakOut \(Retro Arcade Game\)](#) - JavaScript (ES6+), HTML5 Canvas

- *Delivered a browser-based replica of the classic Nintendo Brick Breaker game using pure JavaScript and HTML5 Canvas, delivering a nostalgic gaming experience while showcasing strong core JavaScript skills beyond frameworks.*

Open-Source Contributions

- [Laughy \(Firefox Extension\)](#): Built a browser extension that generates a random dad joke on each user click, helping maintain a positive developer experience and reducing fatigue during development.
- [funny-error-excuse \(NPM Package\)](#): Engineered and published a Node.js package that displays humorous error excuses in the terminal and console during runtime errors, helping decreased debugging frustration and improve developer experience.

Education

Diploma in Electronics and Communication Engineering — Ranchi University, India

Bachelor of Arts (History) — Vinoba Bhave University, India
