Summary

Self-taught Senior Frontend Engineer (5+ years) skilled in React.js, Next.js, and TypeScript, specializing in scalable architecture, performance optimization, and SEO (SSR/SSG). Enhanced performance by 30% and reduced bugs by 60%. Experienced in WCAG, Core Web Vitals, REST/GraphQL, and Agile development. Globally **Published Author** with strong communication and stakeholder collaboration skills.

Skills

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend & APIs: Node.js, Express.js, REST APIs, GraphQL

State & DB: Redux, Context API, MongoDB, MySQL

Architecture: Micro-frontends, SSR, SSG, Component-Based Architecture

Performance: Core Web Vitals, Code Splitting, Lazy Loading, Lighthouse

Testing: Jest, React Testing Library, A/B Testing

Tools: Git, CI/CD, Docker, Vite

Practices: Agile/Scrum, Cross-functional Collaboration, WCAG Accessibility

Remote Work: Virtual collaboration via Microsoft Teams and Zoom, Time management, Document management, Adaptability to time zones, Remote onboarding & Training

Work Experience

Senior Frontend Engineer

Jan 2021 – Present

Promit and Company (Government-registered Startup), India

- **Designed** and implemented scalable micro-frontend architecture using React.js, Next.js, and TypeScript, enabling modular development and independent deployments.
- **Boosted** application performance by 30% through code splitting, lazy loading, and optimization techniques, enhancing Core Web Vitals.
- **Built** SEO-optimized applications using SSR/SSG and integrated REST and GraphQL APIs to improve page speed and search rankings.
- **Decreased** production bugs by 60% using TypeScript, testing, and CI/CD pipelines.
- **Led** frontend development, mentored engineers, and accelerated feature delivery by 40%.
- **Collaborated** with junior developers through code reviews and pair programming, improving development efficiency and maintaining high-quality, scalable frontend codebases.

Projects

1. [Real-Time Wildfire Tracker](#) (React, Leaflet, NASA API)
 - Built a scalable real-time web application delivering live geospatial wildfire data.
 - Optimized rendering for large datasets, ensuring smooth performance and cross-browser compatibility.
2. [Online Bookstore \(Author Platform\)](#) (JavaScript, PayPal SDK)
 - Coded a responsive e-commerce platform for selling self-authored books.
 - Integrated secure payment processing using PayPal SDK.
3. [BreakOut Game](#) (JavaScript, HTML5 Canvas)
 - Created a browser-based arcade game showcasing strong core JavaScript skills.
 - The classic Nintendo Brick Breaker game using pure Vanilla JavaScript and HTML5 Canvas, demonstrating strong fundamentals without relying on any frameworks.

Open Source

1. [Laughy \(Firefox Extension\)](#)
 - Built a browser extension generating random dad jokes to enhance developer experience.
2. [funny-error-excuse \(NPM Package\)](#)
 - Deployed a Node.js package displaying humorous error messages to reduce debugging frustration.

Education

Diploma in Electronics and Communication Engineering — Ranchi University, India

Bachelor of Arts (History) — Vinoba Bhave University, India
