Summary

Self-taught Senior Frontend Engineer with 5+ years of experience in **React.js, Next.js, and TypeScript**, building high-performance and **WCAG-compliant** web applications. Improved performance by **30%** and reduced bugs by **60%**. Skilled in **Agile development**, stakeholder collaboration, and delivering scalable, user-focused solutions. Globally **Published author** with excellent communication skills, adept at navigating Agile cycles and stakeholder management.

Core Skills

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Design, Cross-Browser Compatibility, WCAG Accessibility

Backend & APIs: Node.js, Express.js, REST APIs, GraphQL, API Integration

State Management & Database: Redux, Context API, MongoDB, MySQL

Architecture & Performance: Component-Based Architecture, Micro-Frontends, SSR, SSG, Web Performance Optimization, Core Web Vitals, Code Splitting, Lighthouse

Testing: Jest, React Testing Library, A/B Testing

Tools & DevOps: Git, CI/CD Pipelines, Docker, Vite

Practices: Agile Methodologies, Cross-Functional Collaboration

Work Experience

Senior Frontend Engineer — Promit and Company, Government-registered startup (India)

Jan 2021 – Present, Jharkhand, India

- Architected and implemented scalable micro-frontend architecture using React.js, Next.js, and TypeScript, enabling reusable components, independent deployments, and boosted application scalability.
- Improved application performance by 30% through code splitting, lazy loading, and advanced web performance optimization techniques, enhancing Core Web Vitals and user experience.
- Developed SEO-optimized applications using SSR/SSG in Next.js and efficient API integration (REST APIs, GraphQL), increasing page load speed and search engine visibility.
- Reduced production bugs by 60% by leveraging TypeScript, unit and integration testing (Jest, React Testing Library), CI/CD pipelines, and A/B testing for data-driven improvements.
- Led frontend development and mentored junior engineers, driving 40% faster feature delivery while ensuring high code quality, maintainability, and adherence to best practices.

Projects

1. [Real-Time Wildfire Tracker](#) - React, Leaflet, NASA EONET API

- Built a responsive, scalable real-time web application using React, integrating NASA EONET API to deliver live geospatial wildfire data for global wildlife researchers.
- Optimized frontend performance and UI rendering for large datasets, ensuring smooth user experience and cross-browser compatibility.

2. [Online Bookstore \(Author Platform\)](#) - Vanilla JavaScript, PayPal SDK

- Created a responsive e-commerce web application using JavaScript, enabling users to browse and purchase **self-authored** books with a seamless user experience.
- Integrated secure payment processing using PayPal SDK, ensuring reliable transactions and smooth checkout functionality.

3. [BreakOut \(Retro Arcade Game\)](#) - JavaScript (ES6+), HTML5 Canvas

- Delivered a browser-based replica of the classic Nintendo Brick Breaker game using pure JavaScript and HTML5 Canvas, delivering a nostalgic gaming experience while showcasing strong core JavaScript skills beyond frameworks.

Open-Source Contributions

- [Laughy \(Firefox Extension\)](#): Built a browser extension that generates a random dad joke on each user click, helping maintain a positive developer experience and reducing fatigue during development.
- [funny-error-excuse \(NPM Package\)](#): Engineered and published a Node.js package that displays humorous error excuses in the terminal and console during runtime errors, helping decreased debugging frustration and improve developer experience.

Education

Diploma in Electronics and Communication Engineering — Ranchi University, India

Bachelor of Arts (History) — Vinoba Bhave University, India
